Vendor Engagement Portal on SAP® BTP

Procurement. Simplified.

Digital business requires agility in the supply chain. The time wasted in queries, clarifications and requests for information can slow down your business. It is important to make information secure yet accessible to your partners.

iVen Vendor Engagement Portal built on SAP® BTP is the FASTEST to implement and SIMPLEST to operate.

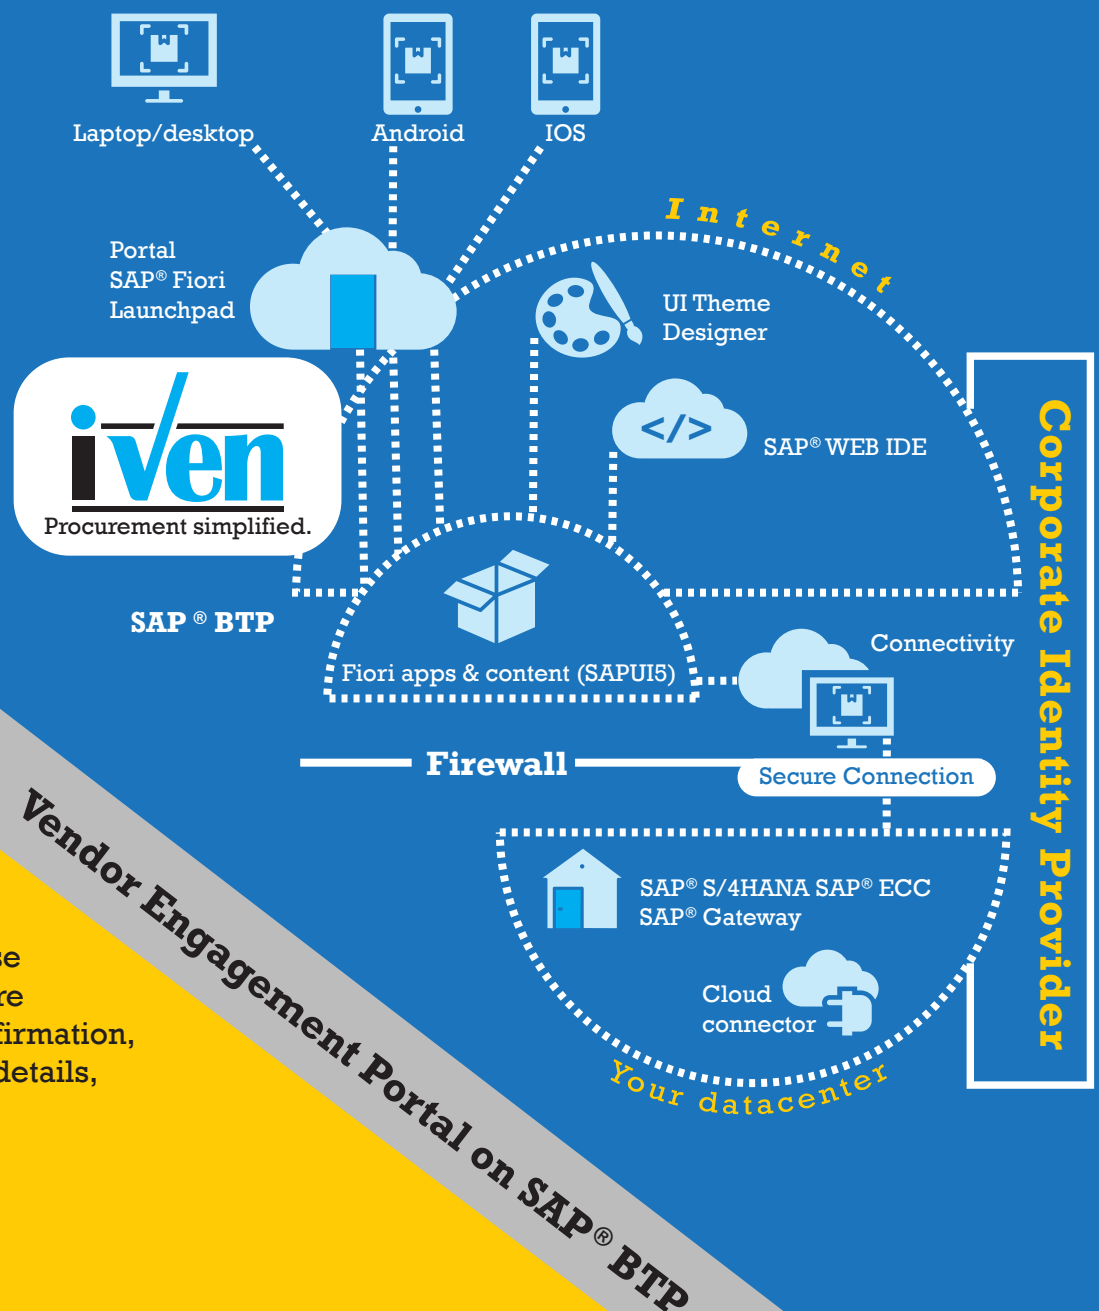

iVen gives access to your for all your supply chain partners such as direct and indirect material suppliers, service providers, logistics providers anytime, anywhere. With real-time integration with your ERP, it makes your procurement process and managing your supply chain, a breeze!

How does iVen work

iVen provides access to your Vendors to be a part of your procurement process and Supply Chain management, from Onboarding and RFP to tracking shipments and invoicing. iVEN integrates with your back-end ERP system to create a seamless process flow.

Procurement simplified.

While your suppliers stay up-to-date with your requirements and purchase orders, your SCM teams are up-to-date with order confirmation, dispatch plans, shipment details, inventory.
